Atoms, Atmas, & Paramatma
Origin of Life & Matter:
Challange to Chemical Evolution

Sunday 7-9 PM

Aug. 14, 1977

M.I.T.

STUDENT CENTER
WEST LOUNGE

sponsored by THE INDIAN ASSOCIATION OF BOSTON

Speakers: T. D. SINGH, PH. D.
R. L. THOMPSON, PH. D.
M. A. MARCHETTI. PH. D.

scientists from BHAKTIVEDANTA INSTITUTE, now conducting a worldwide lecture-tour on the ORIGIN OF LIFE AND MATTER.

ABSTRACT

The fundamental difference between life and matter is consciousness, which can be properly understood only on the basis of a non-reductionistic scientific paradigm using two fundamental units of consciousness, called *ātmā* and *paramātmā*. Mathematical and biological arguments can be used to verify the existence of these two entities in nature, the laws governing their behavior, their interaction with atoms, and their origin. The philosophical and sociological significance of this new discovery will also be discussed.
